

# Natural approach to pain relief

- RELIEVES ASTHMA

**Extracts** of fresh feverfew herb, white willow bark, black cohosh root, fresh skullcap herb with grain alcohol and distilled water. All certified organic or wild crafted.

This is good for headaches, alcohol hangover, sinus infections and migraines. It reduces spasms and vascular pooling to and from the brain.

**Feverfew (*Chrysanthemum parthenium*):** Possesses anti-inflammatory properties, can be used to treat PMS and to relieve headaches and migraines.

**White willow bark (*Salix alba*):** White willow bark is often called herbal aspirin, natural salicylic acid is nearly as potent as aspirin, however, the compound salicin from willow does not cause gastric or intestinal upset or bleeding as aspirin can. This is because willow does not block prostaglandins in the stomach or intestines.

**Black cohosh (*Cimicifuga racemosa*):** Relieves muscle aches and, eye and forehead pains related to headaches.

**Skullcap (*Scutellaria lateriflora*):** Helps alleviate throbbing headaches related to spinal cord injuries.

All botanicals are certified organically grown and/or wild harvested. Organic Freedom extracts superior botanicals in small batches.

### **Ingredients:**

Extracts of feverfew herb, white willow bark, black cohosh root, fresh skullcap herb with grain alcohol and distilled water.

### **Suggested use:**

Shake well. Adults: up to 1 tsp as needed.

**Warning: Do not use during pregnancy unless recommended by your health care practitioner.**
