

Ginkgo

Standardized leaf extract

- INCREASE BLOOD FLOW
- POWERFUL ANTIOXIDANT
- MENTAL HEALTH
- MEMORY

Ginkgo biloba is one of the oldest living tree species in the world. Geological records indicate this plant has been growing on earth for 150–200 million years. It has been used in oriental medicine to treat respiratory and circulatory ailments and to help brain function.

New Roots Herbal only uses a standardized extract from the leaves. Ginkgo biloba leaves contain heterosides, flavonglycosides, bioflavones, lactones and terpenes.

Through hundreds of studies done on this plant, it shows to be a good antioxidant and primarily to have potent action on the cardiovascular system. It acts on the lining of the blood vessels, toning the venous system, thus enhancing oxygenation and blood flow especially to the brain and extremities.

Ginkgo also acts as a powerful antioxidant and contributes to the oxidation of free radicals which are believed to contribute to premature aging and dementia. Antioxidants also protect the eyes, cardiovascular system and central nervous system.

Ginkgo biloba has been used for many years to help in cases of cerebral and peripheral vascular insufficiency, dementia, depression, inner ear dysfunction, vascular fragility.

Ginkgo biloba stimulates cerebral and peripheral circulation. It increases oxygenation and blood flow in the brain, improving brain functions, memory and concentration. It has the same effect on the extremities, keeping hands and feet warm, and helping with problems such as numbness and tingling.

Ginkgo constituents are beneficial for a variety of imbalances and deterioration in the brain and body. Standardized ginkgo extract inhibits platelet activity factor (PAF), which is a common allergen in the body. Physical stress, and poor quality food can overstimulate PAF production; in other words, blood clotting. Excessive PAF can help cause cardiovascular disease, brain damage, hearing disorders and other immune and inflammatory diseases.

Ginkgo has two groups of active substances, flavonoids and terpenes lactones, including ginkgolides A, B, and C, bilobalide, quercetin, and kaempferol. The ginkgolides have been shown to control allergic inflammation, anaphylactic shock and asthma.

Each vegetable capsule contains:

Ginkgo Biloba Extract 24% Flavonglycosides & 6% T. Lactones.	60 mg
Ginkgo Biloba leaf powder.	400 mg

Non-medicinal ingredients: Vegetable magnesium stearate and silicon dioxide, in a NON-GMO vegetable capsule composed of vegetable cellulose and purified water.

Contains no: Yeast, wheat, dairy, sugar, starch, soy, artificial colours or preservative.

Suggested use:

As an addition to the daily diet, take 1 to 2 capsules daily or as directed by your health care practitioner.

Keep out of reach of children.

Manufactured under strict GMP (Good Manufacturing Practices)
