

GrapefruitSeed

Broad-spectrum
anti-microbial

- KILLS PARASITES
- ANTI-FUNGAL

Grapefruit seed extract contains mainly polyphenolic compounds, including quercetin, hesperidin, campherol glycoside, neohesperidin, naringin, apigenin, rutinoid, poncirin, and many other benefic phenols. The polyphenols themselves are unstable but are chemically converted into more stable substances that belong to a diverse class of products called quaternary ammonium compounds. Some quaternary compounds, benzethonium chloride and benzalkonium chloride for example, are used industrially as antimicrobials, but are toxic to animal life. The B vitamin choline is also a quaternary compound, but is non toxic and even essential for maintaining healthy neurological function and fat metabolism.

Grapefruit Seed Extract features the best of both worlds: the quaternary compounds derived from grapefruit exhibit broad-spectrum antimicrobial and antifungal activity, while evidencing none of the toxic side effects of chemically derived quaternaries.

Ingredients:

Grapefruit seed extract and vegetable glycerine.

Contains no: Preservative, artificial flavour or colour, sugar, milk, starch, wheat, corn, soy or yeast.

Suggested use:

Shake well. As a dietary supplement, mix 5–15 drops in a glass of water or juice, 1 to 3 times daily, with or without meals.

Caution: Do not put in eye, or use full strength in mouth, ears, nose or sensitive areas. May cause irritation if used directly on the skin.

Keep out of reach of children.
