

Ingredients:
WILD OREGANO C93 contains:

Pure wild oregano oil (*Origanum minutiflorum*) averaging potency greater than 91% up to 95% carvacrol of total volatile oils blended with extra virgin certified organic olive oil.

Ingredients in this formula have been validated for potency, and certified free of heavy metals, pesticides and solvent residues using:

- Inductively Coupled Plasma Optical Emission Spectrometer (ICP-OES)
- Gas Chromatograph/Mass Spectrometer (GC/MS)
- Gas Chromatograph with Flame Ionization Detector (GC/FID)
- Headspace Gas Chromatography (organic solvent residues)

Wild Oregano C93

Take on colds
and the flu with
confidence

**WILD OREGANO C93:
A SMOOTH, GREAT TASTE WITH
THE STRENGTH OF A CHAMPION!**

Imported directly from the Mediterranean, hand-picked, steam-distilled, and chemical-free, **WILD OREGANO C93** is an effective nutritional supplement for colds, flu, intestinal parasites and sinus infections.

Who says it has to taste bad to work?

The high purity of the *Origanum minutiflorum* species reduces the bitter, harsh taste common to other species of oregano. Plus, **WildOregano C93** is blended with premium, extra virgin, certified organic olive oil to offer a powerful antiviral, antibacterial and antifungal agent with an extra-mild taste.

Highest naturally occurring carvacrol content available: 93.14%

The quality of oregano oil is based on its species and carvacrol content. **WildOregano C93** is the only oregano oil on the market that contains only the rare species *Origanum minutiflorum*, which boasts the highest naturally occurring carvacrol concentration of total volatile oils when compared to other oregano oils available: 93.14%. Recent studies have shown that oregano oil with a high concentration of carvacrol equals the effectiveness of antibiotics without any side effects.

RESEARCH HAS IDENTIFIED CARVACROL AS THE KEY INGREDIENT BEHIND OREGANO OIL'S EXTRAORDINARY PROPERTIES

The science behind WILD OREGANO C93

The species *Origanum minutiflorum* grows in the higher altitudes of the Turkish mountains and contains between 73% and 93% carvacrol.

In a study by Ankara University, it was verified that the carvacrol content reached between 90.7% and 92.95%. It was also verified to be naturally occurring, without the use of any synthetic chemicals or solvents. There are over 21 species of *Origanum* (oregano) growing wild in Turkey alone, and the altitude of where they grow can determine their carvacrol content.

Olympic Testing Standards

At New Roots Herbal, we use the same analytical laboratory equipment (brand and model) as employed by the World Anti-Doping Agency (WADA), which has its headquarters in Montréal. This technology is trusted to validate allegations of the use of performance-enhancing drugs at both the Olympic and professional level.

The pinpoint accuracy of the gas chromatography and mass spectrometry, that can strip an athlete of Olympic gold, also determines—within a fraction of a percent—that the percentages of carvacrol and the other volatile oils such as thymol are in safe and effective proportions to one another.

Our sensitive, high technology instruments have a greater sensitivity than older scientific testing that is often used to produce certificates of analysis. At New Roots Herbal, only the most precise results are trusted for our products.

Safe thymol content

At New Roots Herbal, our steam-distilled **WildOregano C93** has carvacrol content in excess of 90%, the highest naturally occurring carvacrol content as a percentage of total volatile oils. However the existence of the other volatile oils in a naturally occurring, safe, low ratio ensure that our industry-leading **WildOregano C93's** thymol content works synergistically to get results with a safe, natural, and adequate dosage. **Our thymol content is at a safe low level of less than 0.102% in WildOregano C93.**

The Physicians' Desk Reference Guide for Herbal Medicines (Second Edition) recommends that strains of oregano with high thymol content are not suitable, or safe for human use.

With its many therapeutic uses, Wild Oregano C93 has been used to fight numerous health conditions such as:

- Colds and Flu
- Canker sores
- Bacteria and viruses
- Candidiasis
- Parasites
- Dandruff
- Allergies
- Bronchitis
- Ringworm
- Bladder infections
- Cold sores
- Insect bites
- Strep throat
- Toothaches
- Athlete's foot
- Warts
- Gum disease
- Acne

Suggested Use

Take one or more drops under the tongue daily or in 30 ml of water or juice. Swish under the tongue and swallow.

At the first sign of a cold or flu, take 3–5 drops every 2 hours. Maximum 8 times daily.
