and information from New Roots Herbal*

March 3 – April 17, 2011

Spring Break Product Picks

Several products have emerged as favourites to protect your investment in a well-deserved trip to a tropical destination.

A proactive program of **Probiotics Urgency**, followed by a maintenance program with **Acidophilus Ultra**, can prepare your digestive and immune systems for the challenges associated with tropical travel.

New Roots Herbal's **Liver** can also cleanse and prepare your liver for dealing with the extra workload of detoxifying alcohol and breaking down protein and fat from rich indulgent meals.

Body Muscle Lotion, available in convenient travel sizes, can also be a handy addition to any travel kit to help soothe the aches and pains of new athletic endeavors.

Kidney Kare

March is Kidney Health Month in Canada. The number of Canadians **living with kidney failure** has tripled in the last twenty years, to approximately 40,000.

The kidneys filter up to 200 litres of blood daily for osmotic regulation (maintaining fluid levels), toxic metabolic waste excretion, and balancing critical electrolyte levels. The loss of kidney function is usually gradual. **Kidny** and **Clean Flow** contain active botanicals that cleanse the kidneys and entire urinary tract and support renal function.

With the symptoms associated with diabetes being responsible for one third of the cases of kidney failure, New Roots Herbal's **Blood Sugar Balance** can help maintain healthy blood sugar levels that contribute to healthy kidneys.

Natural Selection

The NHPD's criteria for granting NPNs seems to be the reverse of evolution. Natural selection has been replaced by restricting the selection of natural health products by imposing the dangerous synthetic drug model as the criteria for government approval.

For an interesting insight into the predatory program for government approval of natural health products, on our Web site we have posted a publication entitled "The NHP Licensing Crisis", written by Brian Wagner (president of NHP Consulting Inc.) To review and print the entire publication, visit newrootsherbal.com

Download and print this important document now. It is a clear and easy-reading document that you can give to your MP, post on your web site, give copies to your staff, etc. It is simple and presents the problems clearly and explains why Health Canada's NHPD does not work.

Back in Stock

Infla-Heal Plus is now back in stock. **Blood Sugar Balance**, **Forsight** and **Chill Pills** will be back in stock on March 7. Thank you for your patience.

Now Shipping

We will resume shipping of the following temperature-sensitive liquid products as of April 1st. Exceptions will be made if long-term forecasts permit:
