

Wild Omega 3

HELP SUPPORT CARDIOVASCULAR AND COGNITIVE HEALTH

All New Roots Herbal Products Are Tested in Our ISO 17025–Accredited Laboratory

Wild Omega 3 Product Line

Wild Omega 3 is an excellent source of fatty acids for the maintenance of good health. Many studies reveal the benefits of supplementing with omega-3 fish oils at every age of adulthood. Wild Omega 3 fish oil helps support cognitive function and cardiovascular health, and helps reduce serum triglycerides. Like cholesterol, triglycerides are a type of fat in the blood that tends to damage the arteries.

Omega-3 fatty acids are a form of polyunsaturated fats, which are important to human health and can only be acquired by dietary means or supplementation. Fish oil is probably the most important dietary source of omega-3 fatty acids. New Roots Herbal uses fish oil sourced from wild sardines and anchovies; these two species are among the richest in omega-3 fatty acids—farm-raised fish have lower levels of omega-3.

New Roots Herbal's Wild Omega 3 line are the ideal supplements to reap the benefits of the omega-3 fatty acids found in the many species of coldwater fish that would be difficult to reach from consumption alone. You don't like the fishy taste? Try our Wild Omega 3 with natural lemon flavour!

You find our regular softgels hard to swallow? Try our easy-swallow softgels!

180 MG EPA · 120 MG DHA

Each softgel contains:
